EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Devoto Reg. No. 55,108 on April 18, 2007.

IN THE CLAIMS

Please amend claims 17-20 as follows:

17. (Currently Amended) A computer program for transferring electronic data to users of a communications system, the computer program being stored on a tangible computer readable storage medium and comprising instructions for:

establishing a connection between a client and a host, the client including a browser application configured to render data written in HTML;
receiving electronic data from the host in response to a data request transmitted from the client; and

at the client, simultaneously executing multiple openings of the browser application in response to the electronic data received from the host by simultaneously launching the browser application multiple times,

wherein at least one opening of the browser application is configured to exchange messages with at least one other opening of the browser application, the messages being

exchanged through a communications pathway between the at least one opening of the browser application and the at least one other opening of the browser application, the communications pathway being established at the client and located entirely at the client, and

wherein each of the multiple openings of the browser application is configured to render data written in HTML.

18. (Currently Amended) The computer program of claim 17 wherein the computer storage medium comprises a disc.

19. (Currently Amended) The computer program of claim 17 wherein the computer storage medium comprises a client device.

20. (Currently Amended) The computer program of claim 17 wherein the computer storage medium comprises a host device.

Reasons for Allowance

2 The following is an examiner's statement of reasons for allowance: the closest prior of art (Stasnick U.S. Patent No. 6,397,264) does not teach nor suggest in detail at the client simultaneously executing multiple openings of the browser application in response to the electronic data received from the host by simultaneously launching the browser application multiple times, wherein at least one opening of the browser is configured to exchange messages being exchanged through a communications pathway between the at least one opening of the browser application and the at least one other opening of the browser application in combination with all elements of the independent claims as argued by the Applicant (see paper March 22,

2007, page 1 and 3 of the remarks). So as indicated by the above statements, Applicants arguments have been considered persuasive in light of the claim limitations.

3. The dependent claims further limits the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Claims **1-10, 12-20, 22-41, 48-59** and **64-66** are allowed.
